

Performance Test Report

Stress Test

1. Test Scenario & Data

Scenario:

- Number of users: 100
- Ramp-up time: 30 sec
- Ramp-up Steps Count: 30
- Hold Target Rate Time : 180 sec
- Requests simulated:
 - Create Character
 - Update Character
 - Get Characters
 - Get Character by specific ID
 - Delete Character

2. Results Summary

Metric	Value
Total Requests	95049
Successful Requests (%)	100%
Average Response Time (ms)	405.31
95th Percentile Response Time	1469.00
Max Response Time (ms)	3689
Throughput (requests/sec)	451.67
Error %	0.00%

3. Bottlenecks & Issues

- Response time spike observed at 30 and 50 concurrent users (266 to 762 ms).
- High latency for Character Create requests

4. Recommendations

- Optimize request processing logic for the `/character` endpoint.

Performance Test Report

Load Test

1. Test Scenario & Data

Scenario:

- Number of users: 50
- Ramp-up time: 60 sec
- Ramp-up Steps Count: 10
- Hold Target Rate Time : 300 sec

Requests simulated:

- Create Character
- Update Character
- Get Characters
- Get Character by specific ID
- Delete Character

2. Results Summary

Metric	Value
Total Requests	165807
Successful Requests (%)	100%
Average Response Time (ms)	99.06
95th Percentile Response Time	333.00
Max Response Time (ms)	684
Throughput (requests/sec)	459.63
Error %	0%

3. Bottlenecks & Issues

- Response time spike observed for Character Create at 34 concurrent users.
- Latency for other endpoints starts to trend upwards after 40 threads

4. Recommendations

- Optimize request processing logic for the `/character` endpoint.

Performance Test Report

Peak Test

1. Test Scenario & Data

Scenario:

- Number of users: 100
- Ramp-up time: 5 sec
- Ramp-up Steps Count: 5
- Hold Target Rate Time : 20 sec

Requests simulated:

- Create Character
- Update Character
- Get Characters
- Get Character by specific ID
- Delete Character

2. Results Summary

Metric	Value
Total Requests	11807
Successful Requests (%)	100%
Average Response Time (ms)	200.89
95th Percentile Response Time	596.00
Max Response Time (ms)	999
Throughput (requests/sec)	453.94
Error %	0%

3. Bottlenecks & Issues

- Response time drop observed for Character Create at 80 concurrent users.
- Latency for Character Create endpoint starts to rise at 58 threads, while other endpoints show drop, causing Character Delete to miss some created characters (CharacterCreate - 2417 / CharacterDelete - 2330).

4. Recommendations

- Optimize request processing logic for the `/character` endpoint.
- Consider queuing for high concurrency scenarios
